Writing Tips

You can memorize the framework, but can you write?

01 Answer the exact question. Spend the first minutes planning your position and main points.

02 Task 1: describe the main trends and comparisons — don't list every number.

03 Task 2: one clear idea per paragraph, explained and supported with an example.

04 Use vocabulary you can control; memorised phrases that don't fit the topic lower your score.

05 Leave a few minutes to check grammar, articles and verb tenses.
